SONORA SWEATER

The Sonora sweater reflects the color, warmth and texture of the Western desert. The pure wool yarn of which it is knit has a relatively light twist and subtle variations in thickness and color. These combine to produce a special soft home-spun look and texture. Double thickness at the crew neck resists stretching and the rib knit at the hem and cuffs retain their shape and fit. Soft suede leather elbow patches add a touch of style and resist wear. Color: mottled beige. Men's sizes: S, M, L, XL. Women's sizes: S, M, L. Price: $34.00

FAIRISLE SWEATER

A classic hand-loomed sweater of heather textured pure Shetland wool from Ireland. Distinctive cottage-crafted Fairisle pattern across chest, sleeves, and bottom. Subtle colors — dark grey pattern on light grey background or dark blue pattern on light blue background. Men's sizes: S, M, L, XL. Women's sizes: 34, 36, 38. $38.00

BISON PULLOVER

A Canadian heavyweight sweater of lightly brushed virgin wool. The wing collar is generous and protective and there is a handwarmer pouch pocket. ICELANDIC WRAP/TIE SWEATER Price: $75.00

A NOTE ABOUT ICELANDIC WOOL.

Icelandic sheep were brought to the island by Viking settlers in the 9th and 10th centuries and the breed has remained uncrossed ever since. During the centuries since their introduction, the wool of the Icelandic sheep has evolved so that the long hair in the fleece is longer, thinner and glossier and the soft, silky under-hair has become longer and denser and comprises a greater proportion of the fleece, resulting in the world's longest and lightest wool. The five natural color variations of Icelandic wool are: white, malt, black, grey and brown.

ICELANDIC SWEATERS

Timeless, classical styling in luxuriously soft and warm pullovers and cardigans using only the natural color variations of Icelandic wool. Handknit on circular needles, they are completely seamless, surprisingly lightweight and exceptionally warm. Each is unique in pattern and tone. State preference for predominantly light or dark colors. Men's sizes: S, M, L, XL. Women's sizes: S, M, L.

A nubby, linen-like effect is achieved by a reverse twist on the pure wool yarn. This is deftly combined with a repeating chain stitch pattern to give an interesting blend of textures. Color: natural white. Women's sizes: 34, 36, 38. Price: $85.00

KINSALE PULLOVER

A classic crew neck, saddle shoulder pullover in the characteristic Bainin yarn of Ireland. TRAILWISE MOUNTAIN PARKAS

The double-shell mountain parka is a mainstay in any outdoor person's wardrobe. The Trailwise Mountain Parka, like all Trailwise products, is outstanding because of attention to important details. There are no shoulder seams, normally an area of leakage and all seams are strong flat-felled construction. The women's parka is designed to fit a woman's figure properly, and is not a scaled-down man's parka. Full-length two way zipper protected by inner & outer storm flaps, Velcro closures at cuffs, waist drawcord and six pockets — four bellows cargo pockets with Velcro closure, and two handwarmer pockets (women's parka does not have two upper cargo pockets). Tan color lining extends into hood. Color: rust, forest green or light navy.

Pivetta

HOW TO ORDER BOOTS

Please follow these directions carefully. The information requested below is essential if we are to fit your boots properly.

1) Put on the socks you intend to wear with the boots. We suggest one thin liner sock with a thicker wool sock over that. Wool will keep your feet drier when walking, and retains its insulation properties even if wet.

2) Stand on a large piece of paper, with your body weight distributed equally on both feet. While standing erect, have someone else draw *one* clear line defining the perimeter of each foot. It is important that the pencil be held at a constant 90° angle, and not tilted either inward or away from the foot.

3) State your usual dress shoe size. Give both length and width if possible. Example 9-C.

4) Write your name, address, and shoe size on the paper with your foot outline, as well as on the order form.

GUARANTEE:

We guarantee a proper fit. Instruction for trial use of your boots are sent with them. Please observe these directions carefully, as boots worn outdoors are not acceptable for exchange or refund. If the fit is incorrect, send the boots back to us with the coupon provided on the instruction sheet. A new pair of boots is then sent back to you postpaid.

TRAILWISE PACK FRAME

Comfort, durability and lightness have been the foremost considerations in designing the Trailwise frame. The frame is formed of thick walled, non-corrosive 6061 T6 aluminum alloy and every joint is heli-arc welded so that all components contribute to structural strength. The tapered, contoured frame shapes the load around the back and extends the effective carrying area of the back, both in width and height. A full mesh back panel distributes weight and provides maximum air circulation between pack and wearer. Ensolite padded cross straps gives excellent weight distribution and allow the load to be transferred to the hips. The wide 3½" full circle padded hip belt comfortably supports the weight when it is transferred from the shoulders. A nylon hauling strap is secured to the cross member. Rivnuts and eye bolts for mounting Trailwise pack bags are included. The eyebolts can also be used as lashing points. Sizes:

MOSS EAVE TENTS

Bill Moss, designer of the revolutionary "Pop" tent, continues in the Eave tents to utilize the concept of flexible wands supporting the structure. This design, based on flexible tension, is strong and characterized by rounded shapes that "spill" the wind and minimize drag. Anyone can pitch these spacious lightweight tents in a matter of minutes.

Openness and ventilation are achieved with zipper arched front entrance and full width rear window; backed with "no-see-um" proof netting. Contoured fly is easy to attach requiring no extra pegs. Net pockets help in organizing small items. Fabric is fire-retardant nylon and the floor, sidewalls and rainfly are urethane coated. The colors are muted shades of beige and yellow. The vestibule fly coming with both the Eave II and III attaches to the tent easily without extra pegs. The vestibule is large enough to accomodate your packs and muddy boots. Your equipment is kept dry — but outside the tent floor.

SLEEPING BAGS

Trailwise Bags

A warm sleeping bag is essential to any camper's comfort and is probably their most important single purchase. The backpacker requires a sleeping bag that is lightweight and compresses easily for packing. Often, when shopping for a sleeping bag, people ask for "the best bag in the house." There is no such thing, there is only the best bag for an individual's needs. As a general rule one should choose a bag for the coldest use expected and then select the highest quality you can afford.

Quality

All Trailwise bags are constructed by seamstresses who are personally responsible for that bag. Individuals take pride in their work at Trailwise and this results in a quality control impossible with assembly-line, piece-work construction.

The Best Insulating Materials

The insulating materials are 600 fill power goose down and Celanese Fortrel PolarGuard® Goose down is the most efficient insulating material known. The hard to get, mature clusters that Trailwise uses loft to 600 cubic inches per ounce. That higher loft means more warmth with less weight and increased wearability. PolarGuard is a synthetic filler that absorbs only minute amounts of water and even after a drenching rain will still retain most of its insulating qualities. Unlike down, PolarGuard will quickly dry in the sun. Another advantage of PolarGuard over other synthetics is its ability to avoid all cold spots. Because of its continuous fiber construction it will not shift around and seams actually add to its strength.

Tenaya Nylon

Trailwise developed Tenaya nylon for use in down-filled sleeping bags. Beginning with a 50 denier thread, Tenaya is tightly woven with 160 x 140 threads per inch. This high-density cloth after a special finishing process, is down-proof and water-resistant. Tenaya has a smooth silken texture and an outstanding weight/strength ratio.

Shape

All Trailwise bags are a mummy, or modified mummy design. This design significantly increases the insulating efficiency of the bag and keeps weight to a minimum. The hood and shoulder areas of Trailwise sleeping bags are contoured so that they will pull shut to form a smooth and effective hood.

Baffles

To achieve maximum loft and prevent cold spots, Trailwise sleeping bags are differentially cut (i.e. the inner shell is a smaller diameter than the outer shell). Baffles are cut from strong nylon netting and sewn between the two differential shells thus preventing the down from shifting and bunching. Trailwise uses a slanted baffle offset a half-tube width for maximum loft. The baffles are separately sewn off to make each down tube a closed unit, completely eliminating down-shift between the tubes.

Zippers

All Trailwise bags come with a heavy nylon zipper which opens from either the head or the foot for optimum temperature control. Any right and left bag, even though they are different styles or lengths, may be zipped together to form a double bag. Trailwise uses an insulated draft flap behind the zippers to eliminate any drafts.
